Lab 04 — Connect Google Drive and Gmail

Topic 02 · Connectors, Skills and Plugins

THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH

The situation. It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

Your role. You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project. Its lead agent plans each job, starts parallel threads for the pieces, and brings the results back for you to check and approve.

The mission. By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

Scenario

The launch budget and timeline live in a shared Google Drive folder, not on your laptop. You upload the Lab 04 data folder to Drive, connect the Google Drive and Gmail connectors, and have the project read the budget from Drive, reconcile it against the launch brief, save the research brief back to Drive, and email you an approved summary. The budget sheet and the brief disagree on two lines — the project should catch it.

Objective

By the end of this lab you can connect Google Drive and Gmail, read campaign files from Drive and send an approved summary.

You will build

Drive and Gmail connected, the research brief saved to Drive, and an approved launch summary emailed to yourself.

Tools: Claude Projects, Google Drive connector, Gmail connector

In the project

Instructions — HOW: Uses: never send without approval — Claude drafts the email, you approve it.

Context — WHAT: Uses: the launch brief's budget, compared line by line with the Drive sheet.

Folder — WHERE: Reaches out: the Lumo Launch folder in Google Drive and your Gmail, by connector.

Scheduled — WHEN: Not used — runs when you send the prompt.

Data files

From this lab's **data/** folder in lab-04-connect-drive-and-gmail:

- `data/Lumo Launch/lumo-launch-budget.csv`
- `data/Lumo Launch/lumo-launch-timeline.csv`

Lab folder on GitHub: labs-threads/lab-04-connect-drive-and-gmail

Before you start

Note: Replace <YOUR EMAIL> with your own address. Send lab emails only to yourself.

Turning connectors on: Click the **+** in the chat composer, hover **Connectors**, and toggle on only Google Drive and Gmail. You can manage them later under **Customize → Connectors**.

If Claude says "insufficient scope": The connector is linked but was authorised without permission to read files. Fix it in **Settings → Connectors → Google Drive → Reconnect**, and accept the read access Google asks for. Then tell Claude to try again.

Steps and prompts — Reconcile the budget and send the summary

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/threads/

1. Upload the Lab 04 data/Lumo Launch folder to your Google Drive.
   In real work the files are already there; the upload stands in for the shared team drive.
2. In the project, click + → Connectors and switch on Google Drive and Gmail, signing in to Google.
   Accept the read access Google asks for. A connector that shows Connected without read access fails with "insufficient scope".
3. **Send the lab prompt with your own email address in place of <YOUR EMAIL>.**
   No files are attached this time — the project reaches Drive itself.

LAB 04 · PROMPT · COPY INTO CLAUDE

```
Using Google Drive, open the "Lumo Launch" folder.

1. Read lumo-launch-budget.csv and lumo-launch-timeline.csv.
2. Compare the budget sheet, line by line, with the budget in
   lumo-launch-brief.md from our project context. Show both in one
   table and flag every line where they disagree. Do not decide
   which is right.
3. Upload lumo-research-brief.docx from Lab 2 into the same Drive
   folder.
4. Draft an email to <YOUR EMAIL> with the subject
   "Lumo launch - research and budget check": three bullet points
   from the research brief, the budget table with the disagreements
   flagged, the next milestone from the timeline, and a link to the
   brief in Drive.

Show me the draft. Do not send it until I approve.
```

4. Read the budget table Claude produces.
   Both total S$60,000, but Instagram is S$18,000 in the Drive sheet and S$20,000 in the brief, and Influencers is S$12,000 against S$10,000.
5. Confirm Claude flagged both lines instead of choosing one.
   That is your Lab 1 instruction at work. Two sources disagreeing is a decision for a human, not a guess for Claude.
6. Check that lumo-research-brief.docx now sits in the Lumo Launch folder in Drive.
   Saving outputs back to the team's folder is what makes the work findable by colleagues.
7. Read the draft email in full, then approve it.
   Gmail sends only after your explicit approval. Check the figures against the table before you click.
8. Open your inbox and confirm the email arrived with the Drive link working.
   Close the loop: an email you did not check arrived is an email you hope arrived.

Check

DONE WHEN Google Drive and Gmail are connected. Claude read both CSV files from the Lumo Launch folder, showed a budget table totalling S$60,000 on both sides, and flagged Instagram (S$18,000 vs S$20,000) and Influencers (S$12,000 vs S$10,000) without choosing between them. lumo-research-brief.docx is in the Drive folder, and the approved summary email arrived in your own inbox with a working link.

Use only the supplied mock data and your own test accounts. Never put real customer, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.
