Lab 06 — Capture the Brand Voice as an Agent Skill

Topic 02 · Connectors, Skills and Plugins

THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH

The situation. It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

Your role. You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project in Cowork: its instructions, brand kit and working folder are set up once, and every task you start inside it already knows the brand.

The mission. By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

Scenario

Every post and customer email has to sound like Lumo. You rewrite five off-brand captions until they are right, save the routine as a lumo-brand-voice skill with /skill-creator and read its SKILL.md. Then you use it on three waiting messages, spot the gap it leaves, and update the skill so every future reply closes it.

Objective

By the end of this lab you can capture the brand voice as an Agent Skill with /skill-creator, read its SKILL.md, use it on workplace messages and update it.

You will build

A lumo-brand-voice Agent Skill, read in its SKILL.md, used on three workplace messages, then updated with a customer-reply section and retested.

Tools: Claude Projects, Agent Skills, /skill-creator

In the project

Instructions — HOW: Uses: the never-say-healthy rule becomes a check inside the skill.

Context — WHAT: Uses: the brand guidelines the skill is written from, and the product sheet its replies may quote.

Folder — WHERE: Uses: attach the captions, then the customer messages; the skill saves to Customize → Skills.

Scheduled — WHEN: Not used — runs when you send the prompt.

Data files

From this lab's **data/** folder in lab-06-brand-voice-skill:

- `data/lumo-sample-captions.txt`
- `data/lumo-customer-messages.txt`

Lab folder on GitHub: labs/lab-06-brand-voice-skill

Before you start

Note: Blocks 2 and 4 begin with you typing /skill-creator in the composer — it is not part of the pasted text.

Steps and prompts — Rewrite, save, use and update the brand voice

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/

This lab has **five blocks**, sent at different times. Block 1 does the work once. Block 2 saves it as a skill — type /skill-creator first. Block 3 uses the skill on real messages without naming it. Block 4 updates the skill and Block 5 tests the update.

1. Open lumo-sample-captions.txt and read the five captions.
   Each breaks at least one brand rule — a wrong price format, a health claim, too much slang, too many hashtags.

2. **In the project, attach the file and send Block 1.**
   This is the Do step of Do · Verify · Save · Update. You never write a skill from a blank page.

   BLOCK 1 — DO

   Attach lumo-sample-captions.txt and send this first, on its own:

   LAB 06 · BLOCK 1 — DO · COPY INTO CLAUDE

   ```
   Rewrite the five captions in the attached file in the Lumo
   brand voice, following lumo-brand-guidelines.md.

   For each caption, show:
   - the original
   - your rewrite
   - every rule you applied, by name
   - any claim you removed, and why

   Then run these checks on each rewrite and show the result:
   price written as S$3.90; no "healthy" or medical claims; at
   most one Singlish word; #LumoKopi present; no more than five
   hashtags; ends with one clear call to action.
   ```

   Now stop and read the output. Ask for changes until every rewrite sounds right. Whatever you settle on here is exactly what the skill will reproduce.

3. Check each rewrite against the brand guidelines and refine until all five are right.
   This is the Verify step. Ask for changes in plain English; you are teaching the routine by correcting it.

4. **Type /skill-creator in the composer, then paste Block 2 and send.**
   skill-creator writes the SKILL.md from the run you just verified — name, description, instructions and examples.

   BLOCK 2 — SAVE

   Type /skill-creator in the composer, then paste this:

   LAB 06 · BLOCK 2 — SAVE · COPY INTO CLAUDE

   ```
   Create a skill called lumo-brand-voice from what we just did.

   Description: Use when writing or reviewing any customer-facing
   Lumo Kopi content - social posts, captions, emails, video
   scripts or ads.

   It should rewrite or draft content in the Lumo voice, apply the
   brand rules, remove claims we cannot prove, and finish with the
   same checklist of checks we used. Include two of today's
   before-and-after examples as a resource.
   ```

   Approve the skill when Claude shows it to you, then open **Customize → Skills** and read its SKILL.md.

5. Read the skill Claude proposes, especially its description, and approve it.
   The description is the one part always in context. It decides when the skill loads, so it must say WHEN to use it.

6. Open Customize → Skills, open lumo-brand-voice and read its SKILL.md.
   Find the four parts: the name and description at the top, the rules and steps below them, and the examples file beside it. The whole skill is plain text you can read and edit.

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

7. **Start a new task, attach lumo-customer-messages.txt and send Block 3.**
   Three messages waiting for a reply — the same file for everyone. The prompt does not name the skill, so if it loads, its description did its job.

   BLOCK 3 — USE

   Start a new task in the project, attach lumo-customer-messages.txt and send:

   LAB 06 · BLOCK 3 — USE · COPY INTO CLAUDE

   ```
   Draft replies to messages 1 and 2 in the attached file, and
   rewrite the flyer line in message 3 so it is ready to print.
   ```

   The prompt never names the skill. Check the reply's steps: lumo-brand-voice should have loaded by itself.

8. Check that lumo-brand-voice loaded, then read the flyer line and the café reply.
   The flyer line must lose "super healthy" and "best kopi in Singapore" and show S$3.90. The café asks for a wholesale price that is not in the product sheet — the reply must not invent one.

9. Read the reply to message 1 closely.
   Does it promise a refund or a new pack? The skill has no rule for customer replies yet. Fix that gap once, in the skill, not in every prompt.

10. **Type /skill-creator in the composer, then paste Block 4 and approve the change.**
    This is the Update step. Claude shows the change and confirms before it replaces the saved skill.

    BLOCK 4 — UPDATE

    Type /skill-creator in the composer, then paste this:

    LAB 06 · BLOCK 4 — UPDATE · COPY INTO CLAUDE

    ```
    Update the lumo-brand-voice skill. Add a section for replies to
    customers and stockists:
    - thank them, and apologise once if something went wrong;
    - never promise a refund, replacement, discount or any price
      that is not in lumo-product-sheet.md;
    - say the team will reply within two working days;
    - sign off "- The Lumo Kopi team".

    Show me the change before you save over the skill.
    ```

    Read the change Claude proposes, then approve it.

11. **Start a new task, attach the file again and send Block 5.**
    A fresh task proves that the updated skill, not the earlier conversation, made the difference.

    BLOCK 5 — RETEST

    Start a new task, attach lumo-customer-messages.txt again and send:

    LAB 06 · BLOCK 5 — RETEST · COPY INTO CLAUDE

    ```
    Reply to message 1 in the attached file.
    ```

    The reply should follow the new rules without you repeating any of them.

12. Check the new reply to message 1.
    No refund or replacement promised, a reply within two working days, and signed "- The Lumo Kopi team". One edit to the skill now changes every future reply, for you and for anyone who uses it.

Check

DONE WHEN lumo-brand-voice appears under Customize → Skills, and its SKILL.md shows a name, a description that says when to use it, the brand rules and the checklist. In a fresh task, Block 3 loaded the skill without naming it: the flyer line drops "super healthy" and "best kopi in Singapore" and shows S$3.90, and the café reply does not invent a wholesale price. After Block 4 the skill has a customer-reply section, and the Block 5 reply to message 1 promises no refund, says the team will reply within two working days and signs off "- The Lumo Kopi team".
