Lab 08 — Create and Schedule Two Weeks of Social Posts

Topic 03 · Content Production and Scheduled Work

THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH

The situation. It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

Your role. You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project in Cowork: its instructions, brand kit and working folder are set up once, and every task you start inside it already knows the brand.

The mission. By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

Scenario

Launch fortnight needs ten posts across Instagram, TikTok, LinkedIn and Facebook. Each platform has its own format, so the prompt gives Claude a spec for each. It loads lumo-brand-voice, drafts every platform's posts to its spec, and saves one dated calendar. Once you have checked it, you create a scheduled task that emails you each day's post at 9:00am as a draft.

Objective

By the end of this lab you can produce a two-week, four-platform social calendar using the brand-voice skill, and schedule the daily post.

You will build

social-calendar.csv with ten dated posts across four platforms, lumo-social-posts.docx with the full copy, and a weekday 9:00am scheduled task that emails each day's post as a draft.

Tools: Claude Projects in Cowork, Agent Skills, scheduled tasks, Gmail connector

In the project

Instructions — HOW: Uses: brand voice, S$ prices, and never publish without your approval.

Context — WHAT: Uses: the brand kit — every post is checked against its prices and claims.

Folder — WHERE: Adds: social-calendar.csv and lumo-social-posts.docx, saved to the folder.

Scheduled — WHEN: NEW: Today's Lumo post, weekdays at 9:00am — emails you each day's post as a draft.

Data files

From this lab's **data/** folder in lab-08-social-posts:

- `data/social-calendar-template.csv`

Lab folder on GitHub: labs/lab-08-social-posts

Before you start

Note: Attach social-calendar-template.csv from the Lab 08 data folder. Replace <YOUR EMAIL> in Block 2.

Steps and prompts — Create and schedule the launch posts

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/

This lab has **two blocks**. Block 1 creates the calendar. Block 2 is pasted into the Create scheduled task dialog, once you have checked the calendar.

1. **In the project, attach social-calendar-template.csv and send the lab prompt.**
   One task with four precise specs. In the Threads edition each platform gets its own thread; here the specs keep one task on track.

   BLOCK 1 — CREATE

   Start a new task in the project and send:

   LAB 08 · BLOCK 1 — CREATE · COPY INTO CLAUDE

   ```
   Create the launch social calendar for Lumo Cold Kopi: ten posts,
   one each weekday from Tuesday 1 December to Monday 14 December
   2026, using social-calendar-template.csv for the columns.

   Draft each platform's posts to its own spec:
   - Instagram: 3 posts (carousel or Reel), caption with a hook in
     the first line, 3-5 hashtags.
   - TikTok: 3 posts, each a 15-second video script with a hook in
     the first 2 seconds and on-screen text.
   - LinkedIn: 2 posts in the founder's voice, the story behind the
     product, no more than 3 hashtags.
   - Facebook: 2 posts for community and the 12-pack offer.

   Use the lumo-brand-voice skill for every post, and our top
   content theme from the research. The 1 December launch-day
   post is an Instagram Reel; TikTok follows on 2 December.

   Then save them into social-calendar.csv (date, platform,
   format, hook, copy, hashtags, visual idea, call to action) and
   lumo-social-posts.docx with the full copy. Report the brand-voice
   checklist result for every post, and list any post that failed.
   ```

   Check the calendar in the next steps before you schedule anything.

2. Watch Claude work through the four platforms.
   Each platform is drafted against its own spec, so the TikTok scripts and the LinkedIn story stay distinct.

3. Check in the task's activity that Claude loaded lumo-brand-voice.
   The skill you wrote in Lab 6 is now doing its real job: keeping four formats in one voice.

4. When the calendar arrives, count the rows and check the dates.
   Ten rows, weekdays only: 1, 2, 3, 4, 7, 8, 9, 10, 11 and 14 December. Instagram 3, TikTok 3, LinkedIn 2, Facebook 2.

5. Read the brand-voice checklist results.
   Every post should pass. If one fails, ask Claude to redraft it.

6. Spot-check three posts against the campaign brief's "claims we must not make".
   Parallel production is fast; a human check on the claims is what makes it safe to publish.

7. Open lumo-social-posts.docx and confirm the copy matches the calendar.
   The calendar is what the scheduled task you create next reads every morning.

8. **Open Scheduled tasks from the sidebar (or the project's Scheduled panel), choose New task, then Set up manually.**
   Create with Claude asks you questions instead; setting it up manually shows you every field.

   BLOCK 2 — SCHEDULE

   Paste into the Instructions field of a new scheduled task named "Today's Lumo post":

   LAB 08 · BLOCK 2 — SCHEDULE · COPY INTO CLAUDE

   ```
   Take today's row from social-calendar.csv in the project folder,
   polish the post with lumo-brand-voice, and check every price and
   claim against the brand kit. Email it to <YOUR EMAIL> as a draft
   with the subject "Today's Lumo post - <date>".

   Never publish anything and never post to social media. If there
   is no row for today, email "No Lumo post scheduled today".
   ```

   Pick the **Lumo Cold Kopi Launch** project, set **Frequency** to weekdays at 9:00am, and save. Permissions defaults to *Automatically approve* — which is why the task only drafts.

9. Name it Today's Lumo post and paste Block 2 into Instructions, with your own email.
   The task runs in the project, so it inherits the instructions, context, folder and the brand-voice skill — the prompt stays short.

10. Pick the Lumo Cold Kopi Launch project, set Frequency to weekdays at 9:00am, check Permissions, and save.
    Frequency defaults to Manual — a task left on Manual never runs. Permissions defaults to Automatically approve, so the task must only draft.

11. Confirm the task appears under Scheduled with the right days and time, and use Run now if it is offered. Then open the Next Lumo post panel from Lab 7 and click Refresh.
    A test run's email shows exactly what arrives each morning. The panel now reads the calendar and shows the 1 December post.

Check

DONE WHEN social-calendar.csv has ten rows dated on the ten weekdays from 1 to 14 December 2026 — Instagram 3, TikTok 3, LinkedIn 2, Facebook 2 — with the 1 December launch post an Instagram Reel and TikTok on 2 December. Every post passed the lumo-brand-voice checklist, none uses "healthy", every price is written S$3.90 or S$42.00, and lumo-social-posts.docx carries the same copy. Today's Lumo post is listed under Scheduled for weekdays at 9:00am; it drafts and emails only, and nothing was published.

Use only the supplied mock data and your own test accounts. Never put real customer, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.
