# Lab 07 — Add the Marketing Plugin

Topic 02 · Connectors, Skills and Plugins

**THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH**

**The situation.** It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

**Your role.** You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project. Its lead agent plans each job, starts parallel threads for the pieces, and brings the results back for you to check and approve.

**The mission.** By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

## Scenario

You wrote one skill yourself; now you install a toolkit somebody else packaged. Anthropic's Marketing plugin bundles several marketing skills behind namespaced commands. You install it, use /marketing:campaign-plan to stress-test the launch plan, and run /marketing:brand-review on the deck copy — then compare a plugin with the skill you wrote, and see where mods fit.

## Objective

By the end of this lab you can install a plugin and use its namespaced commands alongside your own skill.

## You will build

The Marketing plugin installed, a campaign plan review and a brand review of the launch copy.

**Tools:** Claude Projects, plugins, Customize

## Data files

None — this lab works from what the project already holds.

**Lab folder on GitHub:** labs-threads/lab-07-marketing-plugin

## Before you start

**Note:** Install the plugin first: Customize → Plugins → Browse, find Marketing, click Install. Then type /marketing in the composer to see its commands.

## Steps and prompts — Stress-test the launch with the Marketing plugin

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/threads/

This lab has **two blocks**, each a command from the plugin. Install the plugin first, then send Block 1 and, after you have read its answer, Block 2.

1. Open Customize → Plugins and browse the available plugins.
   Discover before you build: check whether someone has already packaged what you need.
2. Find the Marketing plugin, read what it contains, and click Install.
   One install brings several skills and commands at once — the difference between a plugin and a skill.

3. In the project composer, type /marketing and look at the commands it offers.
   Plugin commands carry the plugin's name as a prefix. That is how you tell them from a skill you wrote yourself.

4. **Send Block 1 to stress-test the plan with /marketing:campaign-plan.**
   The plugin's skill works with your project context: the campaign brief and research brief are already there.

   **BLOCK 1 — PLAN**

   Send this in the project:

   **LAB 07 · BLOCK 1 — PLAN · COPY INTO CLAUDE**

   ```
   /marketing:campaign-plan Review the Lumo Cold Kopi launch using
   our campaign brief and research brief. Keep our objective,
   audience, budget and dates. Tell me:
   - what is missing from the plan,
   - the three biggest risks to the 1 December launch,
   - the KPIs you would track in the first two weeks, with targets.
   Do not change the S$60,000 budget.
   ```

   Read its answer in full before you send Block 2.

5. Read the risks and KPIs it proposes, and check the budget is unchanged at S$60,000.
   A plugin is someone else's judgement. Keep what fits your goal; question what does not.

6. **Send Block 2 to review the deck copy with /marketing:brand-review.**
   Two tools on one job: the plugin reviews, and your lumo-brand-voice skill holds the house rules it checks against.

   **BLOCK 2 — REVIEW**

   Then send:

   **LAB 07 · BLOCK 2 — REVIEW · COPY INTO CLAUDE**

   ```
   /marketing:brand-review Review the copy on slides 1, 2 and 6 of
   our launch deck against lumo-brand-guidelines.md. List each
   change you would make and the rule behind it.
   ```

   Compare its findings with what your lumo-brand-voice skill would flag.

7. Open Customize and look at the Mods section.
   Mods change Claude's interface itself — a panel, a status line, a slash command or a hook. You will not build one today; know where they live.

## Check

**DONE WHEN** The Marketing plugin is installed and its /marketing: commands appear in the composer. /marketing:campaign-plan returned the gaps, three launch risks and two-week KPIs with targets while keeping the S$60,000 budget and the 1 December date. /marketing:brand-review reviewed the deck copy. You can explain the difference between lumo-brand-voice (a skill you wrote), the Marketing plugin (a packaged bundle) and a mod (a change to Claude's interface).

*Use only the supplied mock data and your own test accounts. Never put real customer, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.*
