Lab 02 — Run Market Research in Parallel Tasks

Topic 01 · Claude Projects and Market Research

THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH

The situation. It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

Your role. You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project in Cowork: its instructions, brand kit and working folder are set up once, and every task you start inside it already knows the brand.

The mission. By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

Scenario

Before anyone writes a post, the team needs to know the market. Four subjects need research — competitors, the customer survey, pricing and social trends — and none depends on another. So you start four tasks in the project at once, one per subject, each saving its findings to the folder. A fifth task merges the four files into one research brief, which you check against the data.

Objective

By the end of this lab you can split a multi-subject research job into parallel tasks and verify the merged brief.

You will build

Four research files and lumo-research-brief.docx merged from them, in the project folder.

Tools: Claude Projects in Cowork, parallel tasks, web search

Data files

From this lab's **data/** folder in lab-02-market-research:

- `data/lumo-consumer-survey-2026.csv`
- `data/lumo-competitors.csv`
- `data/lumo-social-trends.csv`

Lab folder on GitHub: labs/lab-02-market-research

Before you start

Note: Copy the three CSV files from the Lab 02 data folder into your Lumo Launch project folder first.

Steps and prompts — Research the market in four parallel tasks

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/

This lab has **five blocks**. Blocks 1-4 each start their own task — send them one after another without waiting. Block 5 goes in a fifth task once the four research files exist.

1. Open the Lab 02 data folder and glance at the three CSV files.
   Know your source: 400 survey rows, six competitors, twelve content themes.
2. Copy the three CSV files into your Lumo Launch project folder.
   Data Claude analyses belongs in the Folder; the brand kit stays in Context.
3. **Start a new task in the project and send Block 1. Do not wait for it.**
   Each task has one subject and one file — a focused brief with a fresh context window. That is why parallel research stays sharp.

   BLOCK 1 — COMPETITORS

   Start a new task in the project and send:

   LAB 02 · BLOCK 1 — COMPETITORS · COPY INTO CLAUDE

   ```
   Research COMPETITORS for the Lumo Cold Kopi launch using
   lumo-competitors.csv: price per can, pack, positioning and
   channel for each brand, and the gap Lumo can own.
   Save your findings as research-1-competitors.md in the project
   folder.
   ```

   Do not wait for it — start the next task straight away.
4. **Start a second task and send Block 2.**
   Several tasks can run in one project at the same time.

   BLOCK 2 — CUSTOMERS

   Start a second task and send:

   LAB 02 · BLOCK 2 — CUSTOMERS · COPY INTO CLAUDE

   ```
   Research CUSTOMERS using lumo-consumer-survey-2026.csv: the share
   likely to buy (intent 4 or 5), split by age band and city; the
   top purchase drivers; the top discovery channels. Show your
   working for every percentage. Save your findings as
   research-2-customers.md in the project folder.
   ```

   Start the third task.
5. **Start a third task and send Block 3.**
   Pricing reads both files; it does not need the other tasks' results.

   BLOCK 3 — PRICING

   Start a third task and send:

   LAB 02 · BLOCK 3 — PRICING · COPY INTO CLAUDE

   ```
   Research PRICING using lumo-competitors.csv and
   lumo-consumer-survey-2026.csv: where S$3.90 sits against the
   competitor median, and the share of respondents willing to pay
   S$3.50 or more. Show your working. Save your findings as
   research-3-pricing.md in the project folder.
   ```

   Start the fourth task.
6. **Start a fourth task and send Block 4.**
   You are now the lead agent: four workers, four subjects, one goal.

   BLOCK 4 — TRENDS

   Start a fourth task and send:

   LAB 02 · BLOCK 4 — TRENDS · COPY INTO CLAUDE

   ```
   Research SOCIAL TRENDS using lumo-social-trends.csv: the three
   content themes with the highest engagement, with one post idea
   each. Save your findings as research-4-trends.md in the project
   folder.
   ```

   Four tasks are now running at once. Watch them finish in the project's task list.

7. **When the four research files are in the folder, start a fifth task and send Block 5.**
   The merge task reads the files, not the other conversations — so the folder is how the tasks share their work.

   BLOCK 5 — MERGE

   When all four files are in the folder, start a fifth task and send:

   LAB 02 · BLOCK 5 — MERGE · COPY INTO CLAUDE

   ```
   Merge research-1-competitors.md, research-2-customers.md,
   research-3-pricing.md and research-4-trends.md from the project
   folder into one research brief, lumo-research-brief.docx:
   a one-paragraph summary, one section per subject with the key
   numbers, and three recommendations for the launch. Name the
   source file under each section, and flag anything the four
   files disagree on.
   ```

   Open the brief and check it against the data in the next steps.

8. When the merged brief arrives, check the survey numbers.
   Expect 400 respondents, 248 likely to buy (62%), and 112 of 152 in the 25-34 band (74%).

9. Check the channel, driver and pricing findings.
   Instagram 136 (34%), TikTok 104 (26%); Taste 124 (31%); competitor median S$4.30 with S$3.90 below it; 228 (57%) would pay S$3.50 or more.

10. Check the trends section and the recommendations.
    The top theme should be Taste tests and first-sip reactions. Do the three recommendations follow from the numbers above them?

Check

DONE WHEN The project folder holds the four research files and lumo-research-brief.docx, whose summary, four sections and three recommendations name their source files. The brief reports 400 respondents, 248 likely to buy (62%), 112 of 152 aged 25-34 (74%), Instagram as the top discovery channel at 34%, Taste as the top driver at 31%, a competitor median of S$4.30 with Lumo's S$3.90 below it, 228 respondents (57%) willing to pay S$3.50 or more, and Taste tests and first-sip reactions as the top content theme.

Use only the supplied mock data and your own test accounts. Never put real customer, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.
