Lab 08 — Create Two Weeks of Social Media Posts

Topic 03 · Content Production and Scheduled Work

THE COURSE SCENARIO · THE LUMO COLD KOPI LAUNCH

The situation. It is late October 2026. Lumo Kopi Co. launches Lumo Cold Kopi, its first ready-to-drink canned kopi, in Singapore on 1 December — six weeks away — and in Kuala Lumpur in January. The marketing team is small, the budget is S$60,000, and nothing has been produced yet: no research, no deck, no posts, no video.

Your role. You are the Lumo marketing team. Instead of juggling a dozen separate chats, you run the whole launch from one Claude Project in Cowork: its instructions, brand kit and working folder are set up once, and every task you start inside it already knows the brand.

The mission. By the end of the day the project holds everything the launch needs — verified market research, a dashboard, a deck and brief, a brand-voice skill, two weeks of social posts, a launch video — and scheduled tasks that keep it moving while you are away.

Scenario

Launch fortnight needs ten posts across Instagram, TikTok, LinkedIn and Facebook. Each platform has its own format, so the prompt gives Claude a spec for each. It loads lumo-brand-voice, drafts every platform's posts to its spec, and saves one dated calendar that you check before anything is scheduled.

Objective

By the end of this lab you can produce a two-week, four-platform social calendar using the brand-voice skill.

You will build

social-calendar.csv with ten dated posts across four platforms, plus lumo-social-posts.docx with the full copy.

Tools: Claude Projects in Cowork, Agent Skills

Data files

From this lab's **data/** folder in lab-08-social-posts:

- `data/social-calendar-template.csv`

Lab folder on GitHub: labs/lab-08-social-posts

Before you start

Note: Attach social-calendar-template.csv from the Lab 08 data folder.

Steps and prompts — Draft two weeks of posts for four platforms

Each prompt sits under the step that sends it. Copy it from the box, or with one click from the Lab Prompts page: https://tertiarycourses.github.io/C1382-Claude-AI-Masterclass/prompts/

1. **In the project, attach social-calendar-template.csv and send the lab prompt.**
   One task with four precise specs. In the Threads edition each platform gets its own thread; here the specs keep one task on track.

LAB 08 · PROMPT · COPY INTO CLAUDE

```
Create the launch social calendar for Lumo Cold Kopi: ten posts,
one each weekday from Tuesday 1 December to Monday 14 December
2026, using social-calendar-template.csv for the columns.

Draft each platform's posts to its own spec:
- Instagram: 3 posts (carousel or Reel), caption with a hook in
  the first line, 3-5 hashtags.
- TikTok: 3 posts, each a 15-second video script with a hook in
  the first 2 seconds and on-screen text.
- LinkedIn: 2 posts in the founder's voice, the story behind the
  product, no more than 3 hashtags.
- Facebook: 2 posts for community and the 12-pack offer.

Use the lumo-brand-voice skill for every post, and our top
content theme from the research. The 1 December launch-day
post is an Instagram Reel; TikTok follows on 2 December.

Then save them into social-calendar.csv (date, platform,
format, hook, copy, hashtags, visual idea, call to action) and
lumo-social-posts.docx with the full copy. Report the brand-voice
checklist result for every post, and list any post that failed.
```

2. Watch Claude work through the four platforms.
   Each platform is drafted against its own spec, so the TikTok scripts and the LinkedIn story stay distinct.
3. Check in the task's activity that Claude loaded lumo-brand-voice.
   The skill you wrote in Lab 6 is now doing its real job: keeping four formats in one voice.
4. When the calendar arrives, count the rows and check the dates.
   Ten rows, weekdays only: 1, 2, 3, 4, 7, 8, 9, 10, 11 and 14 December. Instagram 3, TikTok 3, LinkedIn 2, Facebook 2.
5. Read the brand-voice checklist results.
   Every post should pass. If one fails, ask Claude to redraft it.
6. Spot-check three posts against the campaign brief's "claims we must not make".
   Parallel production is fast; a human check on the claims is what makes it safe to publish.
7. Open lumo-social-posts.docx and confirm the copy matches the calendar.
   The calendar is what Lab 10's scheduled task reads every morning.

Check

DONE WHEN social-calendar.csv has ten rows dated on the ten weekdays from 1 to 14 December 2026 — Instagram 3, TikTok 3, LinkedIn 2, Facebook 2 — with the 1 December launch post an Instagram Reel and TikTok on 2 December. Every post passed the lumo-brand-voice checklist, none uses "healthy", every price is written S$3.90 or S$42.00, and lumo-social-posts.docx carries the same copy.

Use only the supplied mock data and your own test accounts. Never put real customer, personal or confidential data into a training exercise, and send lab emails to yourself rather than to a real recipient.
